Mathematics is a stumbling block for many children to learn the way. this phenomenon is more severe after the third grade. many children is because the math is not ideal. early loss of interest in learning. But mathematics is a basic course very important in the primary school curriculum. Interest in mathematics culture the majority of children. reduce the worry of mathematics learning. to enhance math. this writing group after careful investigation and analysis. well-written elementary school mathematics week training + unit compliance testing volume book. Book to break the cycle of traditional primary cultural and educational books in accordance with the practices of the unit and chapter arrangement. according to the memory of most of the children forgotten to change the learning content of the weekly topics for a training. then the unit standard test volume and mid-term and final test volume into which the book has become a step-by-step organic training highlights. Children through the book either to consolidate within a week to learn the contents of a unit of learning can also be detected. but also on their own interim and final test training. The choreography of this content is in line with the law of children's learning. but also reduce duplication of training. to some extent reduce the burden on children's learning. The book's main features are: (1) is presented in a scientific and rational. Book exercises arranged in accordance with the children a week of learning content. in line with the law of children's learning. and then melt into the unit standard test volumes and midterm and final test volume. making the book into an organic training as...
