In Search of Our Origins: How the Quran Can Help in Scientific Research

By Jamshed Akhtar

Createspace, United States, 2010. Paperback. Book Condition: New. 228 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.In Search of Our Origins, presents complex but interesting information on the origin of life and man. The 119 hints/pointers, extracted from the analysis of the original words of the Quran, seem to tell us how the first molecule of life arose on the planet, what was the mechanism involved, where the event occurred on the primeval earth, and what did happen subsequently. The pointers then tell us how the life is linked to man, how the first man and his mate were created, where they were nurtured initially, and when and where did they appear on the earth. The research also discusses entities like Jinn and malaika (angels), and the concept of Paradise with respect to Adam, within the parameters of the Quran and modern physics. Akhtar argues that the phenomenon of revelations is extraterrestrial, and presents a mechanism for verification of the information that has the potential to permanently lay at rest the debate between creationists and evolutionists.
