

Energy Accounts: Architectural Representations of Energy, Climate, and the Future

By -

Taylor Francis Ltd, United Kingdom, 2016. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book. How does one tell the story of energy production, use, or conservation in a manner sufficiently convincing to influence policy, behavior, and design? Energy Accounts explores potential answers to this question through compelling images, data visualizations, narratives, and other examples of accounting for energy. Organized into a collection containing both examples of best practices and critiques, this impressive array of projects and contributors combines text and graphic material to explore different representations of energy data. Including work from Kieran Timberlake, SHoP, AMO, Lateral Office, WOHA, and many more, the book boasts a unique graphic design which supports and enhances its role as a valuable resource for professionals and students in architecture, engineering, and urban design.

Reviews

These kinds of publication is the greatest pdf available. Better then never, though i am quite late in start reading this one. Once you begin to read the book, it is extremely difficult to leave it before concluding.
