

Probably Approximately Correct: Nature's Algorithms for Learning and Prospering in a Complex World

Filesize: 5.26 MB

Reviews

This book is great. I have go through and so i am confident that i will going to read through once again again in the future. I am just easily can get a satisfaction of looking at a written book.
(Miss Vernie Schimmel)

PROBABLY APPROXIMATELY CORRECT: NATURE'S ALGORITHMS FOR LEARNING AND PROSPERING IN A COMPLEX WORLD

The Perseus Books Group. Paperback. Book Condition: new. BRAND NEW, Probably Approximately Correct: Nature's Algorithms for Learning and Prospering in a Complex World, Leslie G. Valiant, From a leading computer scientist, a unifying theory that will revolutionize our understanding of how life evolves and learns. How does life prosper in a complex and erratic world? While we know that nature follows patterns--such as the law of gravity--our everyday lives are beyond what known science can predict. We nevertheless muddle through even in the absence of theories of how to act. But how do we do it? In *Probably Approximately Correct*, computer scientist Leslie Valiant presents a masterful synthesis of learning and evolution to show how both individually and collectively we not only survive, but prosper in a world as complex as our own. The key is "probably approximately correct" algorithms, a concept Valiant developed to explain how effective behavior can be learned. The model shows that pragmatically coping with a problem can provide a satisfactory solution in the absence of any theory of the problem. After all, finding a mate does not require a theory of mating. Valiant's theory reveals the shared computational nature of evolution and learning, and sheds light on perennial questions such as nature versus nurture and the limits of artificial intelligence. Offering a powerful and elegant model that encompasses life's complexity, *Probably Approximately Correct* has profound implications for how we think about behavior, cognition, biological evolution, and the possibilities and limits of human and machine intelligence.
